HANDS AND FEET TREATMENT

THUYA PRESENTS A NEW BEAUTY SYSTEM FOR YOUR HANDS AND FEET. WITH OUR NEW BEAUTY SYSTEM YOU CAN CHOOSE THE BEST FOR YOUR SKIN, AND TAKE CARE OF IT WITH THE MOST SUITABLE TREATMENT.

6 DIFFERENT OPTIONS TO TAKE CARE OF YOURSELF: ALOE VERA, BIOTIC ACTIVE, HYALURONIC ACID, VITAMINS, OIL COMPLEX AND FLASH TENSOR.

You can always give your skin what it needs most thanks to our new Beauty system vials. They can be applied directly to the skin when needed or they can be mixed with the new base cream and massage it to complete the manicure service with the active ingredient your client desires. Get a perfect result by complementing your service with the new Bamboo scrub.

APPLICATIONS

CABIN APPLICATION

We offer two different protocols:

1. BLISTER + BASE CREAM: when you want to carry out a massage ritual to make the skin more comfortable.

2. JUST BLISTER: when we simply want to make it penetrate without massage.

- We sanitise the area with the hygienic preparatory solution.
- Analyze client's skin and offer the most appropriate treatment, based also on client's main concern.
- Apply Bamboo Scrub with a small massage to remove the excess of dead cells, providing oxygenation, achieving hyperemia in the skin and and promote the absorption of the active ingredients that we will apply next.

This exfoliator does not need to be removed with water, it can be removed dry.

- If only the ampoule is applied, open one vial and used for both hands. If you want to mix it with the base cream, mix the complete ampoule with 2 doses of the Beauty System hands and feet cream and massage until it is completely absorbed.

- The necessary products for home care will be recommended.

NOTES:

This treatment, if desired, can be performed before a traditional manicure or pedicure treatment or after a semi-permanent manicure or pedicure service. This ampoule treatment can form part of the daily beauty ritual for hands throughout the year, or at specific times and even during seasonal changes.

RETAIL HOME MAINTENANCE PROTOCOL

A personalised kit will be designed for each client to meet their needs and they will be instructed on how to apply it correctly.

If the client only applies a single ampoule, it would be recommended to use one daily: either in a single application or split half in the morning and half at night; if more than one ampoule is used, to make a combination, half the contents of each ampoule will be used and mixed. Also apply morning and evening if desired. Apply with a massage until all the product is absorbed.
